# Aims:

**Our curriculum provides children with:**

**Coherent and chronological substantive knowledge** of the history of the **Britain and the wider world**, selected to build pupils' understanding of three vertical concepts. These vertical concepts provide both a concrete lens through which to study and contextualise history, as well as use small steps to help pupils gain a deep understanding of complex, abstract ideas:

- **Community and family**

- What is life like for people in different societies? How are these societies structured? How are family and community relationships different in different historical contexts?

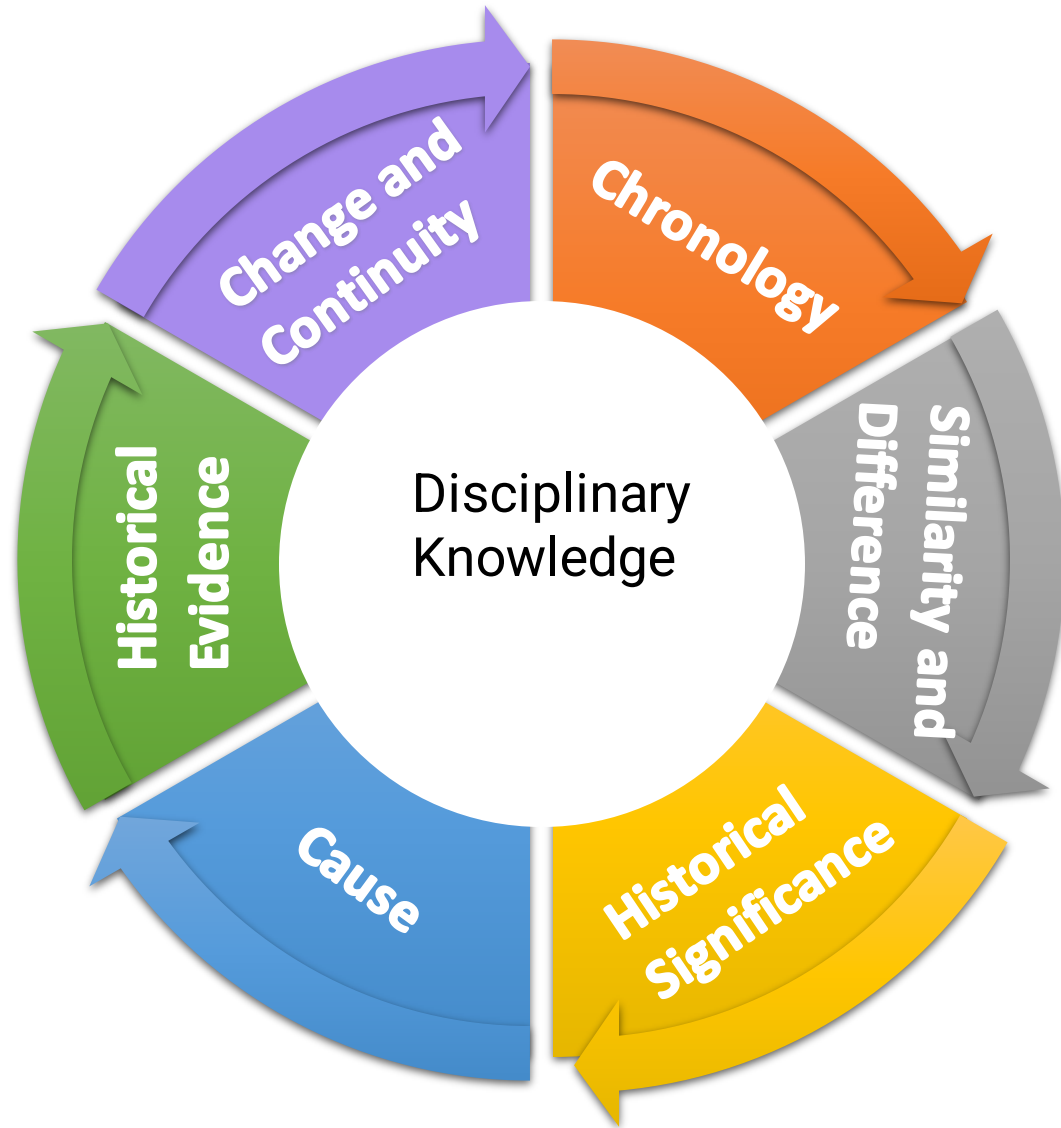

- **Quest for knowledge**

- How do people understand the world around them? What is believed; what is known; what scientific and technological developments are made at the time? How is knowledge stored and shared?

- **Power, empire and democracy**

- Who holds power, and what does this mean for different people in the civilisations? How is power wielded and legitimised? How are people's rights different in different historical contexts?

Pupils make progress in history by developing:

- Their knowledge about the past (this knowledge is often described as 'substantive knowledge') e.g. monarchy, civilization and empire.
- Their knowledge about how historians investigate the past, and how they construct historical claims, arguments and accounts (often described as 'disciplinary knowledge')

# Beyond KS2:

Pupils should extend and deepen their chronologically secure knowledge and understanding of British, local and world history, so that it provides a well-informed context for wider learning. Pupils should identify significant events, make connections, draw contrasts, and analyse trends within periods and over long arcs of time. They should use historical terms and concepts in increasingly sophisticated ways. They should pursue historically valid enquiries including some they have framed themselves, and create relevant, structured and evidentially supported accounts in response. They should understand how different types of historical sources are used rigorously to make historical claims and discern how and why contrasting arguments and interpretations of the past have been constructed.
